Skills

- Competent and experienced programming using C++, C, Javascript, and Perl
- Experienced with MySQL, Python, Ruby, and Java
- Front-end experience with jQuery, Angular 2 with Typescript
- Back-end experience with C++ CGIs, Node.js with Express, and RESTful APIs.
- Strong problem solving and troubleshooting skills
- Uses Agile development practices including TDD and Domain Driven Design
- Knows Git and Subversion version control
- Experienced using Eclipse, Visual Studio, and Sublime
- Hard-working, motivated, and a team-player
- Enjoy challenges, learning, and problem solving
- Talented and passionate for electrical and software engineering fields

Education

BSc, Electrical Engineering, minor in Computer Engineering **2011-2016**

- University of Calgary
- GPA: 3.9/4.0 cumulative
- Notable courses:
  - Computer Graphics Introduction (CPSC 453)
  - Database Management Systems (CPSC 471)
  - Principles of Software Development (ENSF 409)

Work Experience

Hitachi ID Systems, Inc., Calgary **May 2016 - Present**
Junior Software Developer

- Enhanced an ID/access management software used in medium to large orgainizations.
- Improved the product's front-end web interface with Angular 2 with Typescript and jQuery,
- Back-end development with C++ and MySQL.
- Maintained intergration tests with Ruby and Watir.
- Windows development and testing environment with Git, Cygwin, and

Lockheed Martin CDL Systems Ltd., Calgary **May 2014 - Aug 2015**
Software Developer

- Worked on software to interface between two protocols for UAV flight control

- Used Test Driven Development and other Agile methodologies
- Gained experience with C++ with QT, Perl, and Git
- Learned and implemented Domain Driven Design
- Developed for Windows, Linux, and Linux on ARM

NSERC Research, University of Calgary **May 2013 - Aug 2013**
Summer Research Student

- Developed and executed tests to determine accuracy of a hexacopter dropping sensor nodes
- Troubleshooted and solved problems with the hexacopter which were preventing operation of the UAV and execution of the tests
- Created a program to capture position of the hexacopter using video tracking with C++ OpenCV
- Analysis of data using Matlab and C++ for the efficiency of sensor deployment
- Presented results and data in meetings and reports

Extracurricular Activities

University of Calgary Solar Car Electrical Team **Sept 2013 - Jan 2016**

- Created telemetry protocol to communicate over XBee radios
- Used C++ with QT framework
- Worked on embedded system for driver controls
- Interfaced with multiple systems over CAN, UART, and SPI
- Experienced with prototyping circuits and soldering
- Lead software developer, mentored newer members
- Team projects are located here:
  - `www.github.com/UCSolarCarTeam`

Many Mini Bots **Sept 2013 - May 2014**

- A group dedicated for producing and interfacing many small bots
- Involved with building a tricopter
- Focused on documenting setup procedure for future members

Schulich Aerodesign Team **Sept 2011 - Aug 2013**

- Received hands on experience designing and assembling a radio controlled aircraft
- Built two, greater than 2 meter wingspan RC plans for SAE Aerodesign Heavy Lift Competition
- Dealt with very limited resources and hard design constraints throughout the project

Hobbies

- Back-country hiking and camping
- Long distance running, completed first marathon summer of 2015
- Video games
